Experience

ARB Solutions | JavaScript, ReactJS , Node JS , API's

—9months

- Proficient in JavaScript and ReactJS and PHP with over 9 months of hands-on experience, including working with APIs Filters
- Demonstrated ability to develop user-friendly web applications using ReactJS
- Proven ability to write clean, efficient code following best practices, with a focus on API integration and loop implementation.

Startup Community | JavaScript, ReactJS , Node JS , API's

- Developed a JavaScript-based web platform using React.js, Node.js, and Express.js to connect users with similar businesses and startups.
- Integrated API functionality to enable seamless communication and data exchange.
- Implemented user authentication and authorization protocols to ensure data security and privacy.
- Created an intuitive and engaging user interface with React.js for an optimal user experience.
- Engineered a scalable backend infrastructure using Node.js and Express.js.
- Collaborated with the design team to integrate attractive interfaces with backend functionality.
- Conducted rigorous testing and debugging to ensure platform reliability and quality.

E-commerce | PHP , JavaScript , JQuery , API's

- Designed and developed an e-commerce platform with an intuitive user interface and fast, secure browsing experience.
- Implemented an innovative admin panel to enable dynamic changes to the website's theme and content, providing a one-stop solution for e-commerce management.
- Integrated API's for seamless connectivity with payment gateways and third-party services, ensuring a comprehensive e-commerce solution.
- Engineered the backend using PHP to ensure data security and integrity, allowing for dynamic updates without compromising data privacy.

Technical Skills

Technologies/Frameworks/Libraries

- React.JS
- Node.JS
- MongoDB
- NextJs
- Express.JS
- JavaScript

Projects

Snapverse | MERN | Link | April 2022

- An interactive Full stack social media application
- Features includes create, like, view, edit, share and delete posts by **Express.js** and Backend by **Node.js**
- Faster user login through **Redis Cache**
- High availability of Data through MongoDB atlas node **Replication** feature

Weather App | ReactJS | Link | December 2021

- A single page application to get weather information
- A search bar to provide location or pincode
- App will request an **API** with provided search value
- Fetched response will display over **React.js** Frontend in user interactive format

Todo list | ReactJS | Link | December 2021

- A single page application to add and delete todo list items
- A search bar to search through all lists
- App has add and delete functionality
- The app is responsive and optimised with **React.js** Frontend in user interactive format
